DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 3,6,10, and 21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6259156. Although the conflicting claims are not identical, they are not patentably distinct from each other because: See that US 6259156 teaches a semiconductor device wherein:

- A first terminal (see "a pre-set number of terminals") of an active element connected via thermally and electrically conductive member and a second terminal; an "insulating member exhibiting good thermal conductivity or thermally conductive
- A heat sink member of a package
- The thermally conductive electrically insulating member connecting one of the plurality of terminals of the active member to the heat sink

Art Unit: 2827

See that although the claims of US 6259156 do not clearly recite specifically that:

- The active member transmits heat to said heat sink member via at least a thermally conductive electrically insulating member
- The heat sink member has an electrically and thermally conductive protrusion

It would be obvious to one with ordinary skill in the art that the active member transmits heat to the heat sink member, and that such would happen via the claimed thermally conductive electrically insulating member for such member is interposed between the heat slug and the heat generating structure.

It would also be obvious to one with ordinary skill in the art that if the electrically insulating thermally conductive member is connected to the heat sink, it will form a structure with a protrusion.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to draw heat from a heat-generating member with a thermally conductive member, which in turn also forms a protrusion on the heat slug, since thermally conductive member have long been used in the art to connect heat slugs to heat generating members.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
